L'ALTRA PIETRA[®] is the most complete and exclusive high thick sintered stone brand, that is high quality porcelain stoneware, in real full body or color body suitable for any kind of outdoor solution. It boasts different colors and sizes, with an aesthetic rendering extremely faithful to natural stone: veins, imperfections, colors and everything else contributes to recreating the beauty and elegance of the most appreciated stone materials.

L'ALTRA PIETRA[®] è il più completo ed esclusivo brand di pietra sinterizzata, ovvero gres porcellanato di alta qualità, in vera tutta massa o massa colorata ad alto spessore, adatto per qualsiasi tipo di soluzione outdoor. Vanta diversi colori e formati, con una resa estetica estremamente fedele alla pietra naturale: venature, imperfezioni, colori, tutto concorre a ricreare la bellezza e l'eleganza dei più apprezzati materiali lapidei.

L'ALTRA PIETRA[®] ist die vollständigste und exklusivste Marke von Feinsteinzeug in Full Body oder Color Body mit 2 cm Stärke, die für jede Art von Außenlösungen geeignet ist. Sie sind in verschiedenen Farben und Größen erhältlich, mit einer ästhetischen Wiedergabe, die dem Naturstein extrem ähnlich sind: Adern, Unvollkommenheiten, Farbunterschiede, alles trägt dazu bei, die Schönheit und Eleganz der am meisten geschätzten Steinmaterialien wiederzugeben.

L'ALTRA PIETRA[®] est la marque de grès cérame la plus complète et exclusive en pleine masse ou bien avec masse colorée avec haute épaisseur adaptée à toute typologie de solution extérieure. Il présente différentes couleurs et tailles, avec un rendu esthétique extrêmement fidèle à la pierre naturelle: veines, imperfections, couleurs, tout contribue à recréer la beauté et l'élégance des matériaux en pierre les plus populaires.

OUTDOOR FURNITURE

ARREDO ESTERNO
MÖBEL FÜR DEN
AUßENBEREICH
MOBILIER D'EXTÉRIEUR

A new way of designing the outdoors: flowerpot, seats, vases, benches and bollards in sintered stone for parks, terraces, gardens, courtyards and squares. The combination of these elements allows the realization of a real modular system with products of the same tone, color and material.

Un nuovo modo di progettare l'outdoor: fioriere, sedute, vasi, panchine e dissuasori in pietra sinterizzata per parchi, terrazzi, giardini, cortili e piazze. La combinazione di questi elementi permette la realizzazione di un vero e proprio sistema modulare con prodotti dello stesso tono, colore e materiale.

Eine neue Art, den Außenbereich zu gestalten: Blumentöpfe, Sitzgelegenheiten, Vasen, Bänke und Poller aus Feinsteinzeug für Parks, Terrassen, Gärten, Höfe und Plätze. Die Kombination dieser Elemente ermöglicht die Realisierung eines echten modularen Systems mit Produkten im gleichen Ton, in der gleichen Farbe und im gleichen Material.

Une nouvelle façon de concevoir l'extérieur: pots de fleurs, sièges, vases, bancs et bornes en grès cérame pour parcs, terrasses, jardins, cours et places. La combinaison de ces éléments permet la réalisation d'un véritable système modulaire avec des produits de même ton, couleur et matière.

COLOSSEO GRIGIONI

PLANTER - FIORIERA - BLUMENTOPF - JARDINIÈRE

Starting from the range of available sizes, it is possible to obtain flowerpots of any size, shape and color.

Partendo dalla gamma di formati disponibili è possibile ricavare fioriere di qualsiasi dimensione, forma e colore.

Ausgehend von der Palette der verfügbaren Größen ist es möglich, Blumentöpfe in jeder Größe, Form und Farbe zu erhalten.

À partir de la gamme de formats disponibles, il est possible d'obtenir des jardinières de toutes tailles, formes et couleurs.

In public zones or private gardens, in the presence of lawn slabs, they can be laid dry on top of grass without using any adhesives. This allows you to change the flooring at any time and to reuse the same slabs several times. Dry laying does not require the intervention of specialized professionals and is immediately walkable.

In presenza di fondi erbosi, sia in abitazioni private che in aree pubbliche, le lastre vengono posate a secco sul basamento senza l'utilizzo di collanti edili. Ciò permette di modificare le pavimentazioni in qualsiasi momento e di riutilizzare le stesse lastre più volte. La posa a secco non richiede l'intervento di professionisti specializzati e risulta immediatamente calpestabile.

Bei Rasenflächen in privaten oder öffentlichen Gärten werden die Platten trocken auf dem Untergrund, ohne Verwendung von Bauklebern, verlegt. Auf diese Weise können die Böden jederzeit geändert und die selben Platten mehrmals wiederverwendet werden. Für die Trockenverlegung werden keine Fachleute benötigt und der Boden ist sofort begehbar.

En présence d'herbe, dans les jardins privés ou dans les zones publiques, les dalles sont posées à sec sur la base sans colles techniques. Cela permet de modifier les pavages à tout moment et de réutiliser les dalles plusieurs fois. La pose à sec n'exige pas l'intervention de spécialistes et elle est immédiatement praticable.

DRY-LAY INSTALLATION ON SAND OR GRAVEL

POSA A SECCO IN APPOGGIO SU SABBIA O GHIAIA
TROCKENE VERLEGUNG DURCH AUFLAGE AUF SAND ODER KIES
POSE À SEC EN APPUI SUR SABLE OU GRAVIER

The slabs can be laid dry without the need adhesives. This means the slabs are easily levelled out on top of the sand/gravel and are ready for use immediately afterwards. This allows users to change the paving at any time or reuse the same material several times, even in different locations.

Le lastre si possono posare a secco senza l'utilizzo di collanti edili. Ciò permette di assestare e livellare velocemente la lastra sulla sabbia/ghiaia risultando immediatamente calpestabile. Questo metodo permette di modificare il disegno di posa in qualsiasi momento o di riutilizzare le stesse lastre più volte anche in contesti diversi.

Die Platten können ohne Klebstoffe trocken verlegt werden. Dadurch lassen sich die Platten einfach auf dem Sand/Kies nivellieren und sind danach sofort einsatzbereit. So kann der Nutzer den Belag jederzeit wechseln oder das gleiche Material mehrmals wiederverwenden, auch an unterschiedlichen Orten.

Les dalles peuvent être posées à secs sans avoir besoin de colles. Cela signifie que les dalles sont facilement nivelées sur le sable/gravier et sont prêtes à l'emploi immédiatement après. Cela permet aux utilisateurs de changer de pavage à tout moment ou de réutiliser plusieurs fois le même matériau, même à des endroits différents.

The advanced technical features of the sintered stone collections, combined with an adhesive laying technique on screed, allow users to create perfectly stable and exceptionally hard-wearing surfaces. The slabs used with this solution can withstand both moving and parked vehicles. Ideal for heavily frequented areas, in particular for squares, pavements, or ramps. Expansion joints are necessary and joints must be filled with cementitious grout.

Le elevate caratteristiche tecniche delle collezioni in pietra sinterizzata combinate alla soluzione di posa a colla su massetto permettono di generare superfici perfettamente stabili ed eccezionalmente resistenti. Le lastre utilizzate con questa soluzione sono in grado di sopportare il passaggio e la sosta di autoveicoli. Ideali per tutte le strutture urbane molto frequentate quali piazze, marciapiedi o rampe. Sono necessari i giunti di dilatazione e le fughe tra le lastre devono essere riempite con stucco cementizio.

Die fortschrittlichen technischen Merkmale der Feinsteinzeugkollektionen in Kombination mit einer klebenden Verlegetechnik auf Estrich ermöglichen es dem Benutzer, perfekt stabile und außergewöhnlich strapazierfähige Oberflächen zu schaffen. Die mit dieser Lösung verwendeten Platten können sowohl fahrenden als auch geparkten Fahrzeugen standhalten. Ideal für stark frequentierte Bereiche, insbesondere für Plätze, Gehwege oder Rampen. Dehnungsfugen sind notwendig und Fugen müssen mit Zementmörtel gefüllt werden.

Les caractéristiques techniques avancées de la collection en grès cérame combinées avec la solution de pose adhésive sur la chape, elles permettent de créer surfaces parfaitement stables et exceptionnellement résistantes. Les dalles utilisées avec cette solution-ci, elles peuvent soutenir le passage et l'arrêt de voitures. Idéales pour toutes les structures urbaines souvent fréquentées comme places, trottoirs ou rampes. Les jointures sont nécessaires et elles doivent être jointoyées avec ciment.

The slabs are laid on a base of sand mixed with cement. This technique guarantees the slabs long term stability and their vehicle accessibility. It also allows to lay the slabs straight on the floor screed avoiding the high costs of the levelling screed arrangements. Expansion joints are necessary and joints must be filled with cementitious grout.

Le lastre vengono posate su una base di sabbia mista a cemento, questa tecnica garantisce la stabilità delle lastre a lungo termine e la carrabilità. Inoltre permette di posare le lastre direttamente su massetto evitando i costi elevati di predisposizione della caldana. Sono necessari i giunti di dilatazione e le fughe tra le lastre devono essere riempite con stucco cementizio.

Die Platten werden auf eine mit Zement vermischte Sandbasis gelegt. Diese Technik garantiert die Langzeitstabilität der Platten und ihre Zugänglichkeit für Fahrzeuge. Es ermöglicht auch, die Platten gerade auf den Estrich zu legen, wodurch die hohen Kosten der Nivellierestrichanordnungen vermieden werden. Dehnungsfugen sind notwendig und Fugen müssen mit Zementmörtel gefüllt werden.

Les dalles sont posées sur une base de sable mixée avec du ciment, cette technique-ci garantie la stabilité des allées à long temps et sa caractéristique carrossable. De plus elle permet de poser les dalles directement sur la chape, en évitant coûts élevés pour niveler. Les jointures sont nécessaires et elles doivent être jointoyes avec ciment.

Floating paving is composed by a series of modular and adjustable supports, that easily and safely adapt to all paving types. Designed to guarantee an homogeneous surface, without bringing radical changes to the existing structure, as well as to eliminate humidity problems, water infiltrations, passage of electric cables and pipes, floating paving solutions allow easy and quick inspections and rainwater efficient drainage.

Il pavimento sopraelevato è composto da una serie di supporti modulari, che con semplicità e sicurezza si adatta ad ogni tipo di superficie. Ideata per garantire sempre una pavimentazione omogenea, senza apportare interventi radicali alla struttura preesistente ed eliminare i problemi di umidità, infiltrazioni d'acqua, passaggio di cavi o tubi, permettendo una facile e veloce ispezionabilità e un efficace smaltimento delle acque meteoriche.

Schwimmende Verlegung besteht aus einer Reihe von modularen und verstellbaren Stützen, die so einfach sind und sich sicher an alle Flächen anpassen. Entwickelt, um eine homogene Oberfläche zu schaffen, ohne radikale Änderungen an der bestehenden Struktur, sowie zu beseitigen Feuchtigkeitsprobleme, Wasserinfiltrationen, Durchführen von elektrischen Kabeln und Rohren, schwimmend Verlegung ermöglichen einfache und schnelle Inspektionen und eine effiziente Entwässerung des Regenwassers.

Le dallage surélevée est composé par une série de supports modulaires, qui, avec simplicité et sécurité, s'adaptent à chaque type de surface. Idée pour garantir toujours un dallage uniforme, sans apporter des modifications radicales à la structure préexistante et éliminer les problèmes d'humidité, d'infiltration de l'eau, de passage de câbles et tuyau, en permettant une inspection rapide et facile et un drainage de l'eau de pluie efficace.

ADJUSTMENT KEY

CHIAVE DI REGOLAZIONE - REGULIERUNGSSCHLÜSSEL - CLEF DE REGLAGE

Adjustable supports offer many solutions to compensate any surface small imperfections and high slopes, in order to create pavings that are always levelled and stable. The exclusive adjustment key adjusts supports (and consequently the overlaying floor) even in case of finished floor, without lifting it.

I supporti regolabili offrono molteplici soluzioni per compensare piccole imperfezioni e grandi pendenze di qualsiasi piano di posa così da realizzare sempre pavimentazioni perfettamente stabili e piane. L'esclusiva chiave di regolazione, permette la regolazione dei supporti (e conseguentemente del pavimento soprastante) anche a pavimento finito evitando pertanto di doverlo sollevare.

Die einstellbaren Stützen bieten zahlreiche Lösungen, um kleine Unregelmäßigkeiten und große Neigungen jeder beliebigen Auflagefläche auszugleichen, so dass immer perfekt stabile und ebene Bodenbeläge entstehen. Der exklusive Regulierungsschlüssel ermöglicht die Einstellung der Stützen (und damit des darüber liegenden Fußbodens) auch nachdem der Bodenbelag fertig ist, wodurch sein Anheben vermieden wird.

Les supports réglables offrent de multiples solutions pour compenser les petites imperfections et les grandes déclivités de n'importe quelle surface de pose de façon à toujours réaliser des pavements parfaitement stables et plats. La clef de réglage exclusive permet de régler les supports (et donc le revêtement du dessus) même lorsque le pavement est terminé si bien qu'il n'est plus nécessaire de le soulever.

EASY PAVING THE NEW INSTALLATION SYSTEM

IL NUOVO SISTEMA DI INSTALLAZIONE
DAS NEUE VERLEGESYSTEM
LE NOUVEAU SYSTÈME D'INSTALLATION

A product by Granulati Zandobbio, designed to ease the laying of sintered stone paving with 40x80 cm slabs in two different thicknesses: 2 and 3 cm. The product is made of 100% postconsumer recycled plastic and it is 100% recyclable after its use. The dry laying simplifies and speeds up installation which does not require glue or concrete. Its structure was designed to avoid chipping and keep the joint thickness constant along the entire paving, without the use of spacers.

Un prodotto di Granulati Zandobbio, ideato per facilitare la posa di pavimentazioni in pietra sinterizzata con lastre 40x80 cm in due diversi spessori: 2 e 3 cm. Il prodotto è composto al 100% da plastica riciclata post consumo ed è riciclabile al 100% dopo il suo utilizzo. La posa in appoggio semplifica e velocizza l'installazione che non necessita di colla o cemento. La sua struttura è stata ideata per evitare sbecchature e mantenere la fuga costante lungo tutta la pavimentazione, senza l'ausilio di distanziatori.

Ein Produkt von Granulati Zandobbio das entwickelt wurde, um das Verlegen von Feinsteinzeug in den Maß 40x80 in den Stärken 2 und 3 cm zu erleichtern. Das Produkt besteht zu 100% aus recyceltem Kunststoff und ist nach seiner Verwendung vollständig recycelbar. Die Trockenverlegung vereinfacht und beschleunigt die Installation, weil zum Beispiel keinerlei Kleber eingesetzt werden muss. Seine Struktur wurde entwickelt, um Abplatzungen zu vermeiden und um die Fugenbreite konstant zu halten, ohne dass Abstandhalter verwendet werden müssen.

Le Easy Paving est conçu par Granulati Zandobbio, pour simplifier la pose des dalles en grès cérame format 40x80 cm, Ép. 2 et 3 cm. C'est un produit fabriqué avec du plastique recyclé à 100% postconsommation et peut être réutilisé. La pose en appui simplifie sa mise en oeuvre sans devoir utiliser de la colle ni faire usage de ciment. Sa structure est réalisée non seulement pour éviter les ébréchures mais aussi pour assurer un drainage constant sans faire usage de joints de carrelage.

VENTILATED FAÇADES, KERF SYSTEM FACCIATE VENTILATE, SISTEMA KERF BELÜFTETE FASSADEN, KERF-TECHNOLOGIE FACADES VENTILÉES, SYSTÈME DE KERF

A: Slab - Lastra - Platte - Dalle
B: Bracket - Staffa - Klammer - Support
C: Structure - Struttura - Struktur - Structure
D: Wall - Muro - Wand - Mur

The KERF technology applied to the 2 cm slabs allows the cladding to be anchored in total safety by means of brackets that allow the upper slab to be supported and prevent the one below from overturning. In addition to the obvious functional advantages, it allows to contain costs and guarantees greater impact resistance than other systems. Maximum recommended size 120x120x2 cm.

La tecnologia KERF applicata alle lastre di 2 cm permette l'ancoraggio in totale sicurezza del rivestimento mediante staffette che consentono di sostenere la lastra superiore ed impedire il ribaltamento di quella sottostante. Oltre agli evidenti vantaggi funzionali consente di contenere i costi e garantisce una maggiore resistenza all'urto rispetto ad altri sistemi. Dimensione massima consigliata 120x120x2 cm.

Die KERF-Technologie, die auf die 2-cm-Platten angewendet wird, ermöglicht eine absolut sichere Verankerung der Verkleidung mit Hilfe von Bügeln, die es ermöglichen, die obere Platte zu stützen und das Umkippen der darunter liegenden Platte zu verhindern. Neben den offensichtlichen funktionalen Vorteilen ermöglicht es eine Kosteneinsparung und garantiert eine höhere Stoßfestigkeit als andere Systeme. Maximal empfohlene Größe 120 x 120 x 2 cm.

La technologie KERF appliquée aux dalles de 2 cm permet d'ancrer le bardage en toute sécurité grâce à des équerres qui permettent de soutenir la dalle supérieure et d'éviter que celle du dessous ne se renverse. En plus des avantages fonctionnels évidents, il permet de contenir les coûts et garantit une plus grande résistance aux chocs que les autres systèmes. Taille maximale recommandée 120x120x2 cm.

Produkt rektifiziert. Produkte ohne Angabe sind immer rektifiziert
Produit rectifié, lorsqu'il n'est pas mentionné le matériau doit toujours être considéré comme rectifié

**NATURAL PRODUCT FROM MOLDING,
UNRECTIFIED**

Prodotto naturale da pressa non rettificato
Produkt kommt direkt aus der Form und ist nicht rektifiziert
Produit naturel de moulage, non rectifié.

**THE SLABS ARE RECTIFIED BEFORE BURNING ON PART
OF THE THICKNESS IN ORDER TO LOWER THE CONICITY
TYPICAL OF UNRECTIFIED SLABS**

Le lastre vengono rettificate a crudo su parte dello spessore al fine di ridurre la conicità tipica delle lastre non rettificate.
Die Platten werden vor dem Brennen auf einen Teil der Höhe rektifiziert um bessere Eigenschaften wie bei der Naturkante zu haben.
Les dalles sont rectifiées sur une partie de l'épaisseur avant la cuisson pour réduire leur valeur typique de conicité.

**THE SLABS INCLUDE SPACERS THAT GUARANTEE JOINTS
THICKNESS AND REDUCE INSTALLATION DURATION**

Le lastre includono distanziali ideati per garantire la fuga costante e ridurre i tempi di posa
Die Platten enthalten Abstandhalter, die die Breite der Fugen garantieren und die Verlegedauer verkürzen
Les dalles comportent des espaceurs qui garantissent l'épaisseur des joints et réduisent la durée de pose

COLOR WARNING

Color shades shown in this catalog are merely indicative because the printed output undergoes significant changes compared to the original color.
The color shade of the slab can vary between different sizes of the same color.

AVVERTENZA COLORE

I colori illustrati in questo catalogo hanno valore puramente indicativo in quanto la resa stampata subisce notevoli cambiamenti rispetto al colore originale.
Il tono colore della lastra può variare tra una misura e l'altra dello stesso prodotto.

FARBWARNUNG

Die in diesem Katalog gezeigten Farben sind nur als Hinweis zu verstehen, da die gedruckte Ausgabe im Vergleich zur Originalfarbe abweichen kann. Bei jeder neu produzierten Charge gibt es Farbabweichungen.

AVERTISSEMENT DE COULEUR

Les nuances de couleur présentées dans ce catalogue sont purement indicatives car la sortie imprimée subit des modifications importantes par rapport à la couleur d'origine. La couleur de la plaque peut subir des variations d'une mesure à l'autre.

LAYING ADVICE

It is advisable to create the appropriate transverse and longitudinal gradients during levelling or compacting, in order to ensure optimal drainage of the floor. We recommend the incorporation of a drainage substrate in order to facilitate runoff and prevent water pooling. It is also advisable to lay the slabs with a minimum joint of 3mm.

Given the frost resistance of sintered stone, the slabs offer a water absorption value closed to zero. This property could lead to localised pooling of water on the floor, even if the slabs are laid properly.

RACCOMANDAZIONI DI POSA

È bene prevedere le opportune pendenze trasversali e longitudinali da realizzare durante il livellamento o la compattazione per ottenere un drenaggio ottimale del piano di calpestio. Si raccomanda di prevedere un substrato realizzato con materiali drenanti per facilitare il deflusso dell'acqua ed evitarne il ristagno. Inoltre si consiglia una posa con fuga minima di 3 mm. Vista la caratteristica di ingelività della pietra sinterizzata, le lastre hanno il valore relativo all'assorbimento d'acqua praticamente nullo. Tale proprietà potrebbe comportare ristagni di acqua localizzati sulla pavimentazione, indipendentemente dalla realizzazione di una posa a regola d'arte del materiale.

EMPFEHLUNGEN FÜR DIE VERLEGUNG

Bei der Nivellierung und Kompaktierung müssen die notwendigen Quer- und Längsneigungen geschaffen werden, damit die ordnungsgemäße Drainage der Lauffläche möglich ist. Es wird empfohlen einen aus drainierendem Material bestehenden Unterboden, um das Abfließen des Wassers zu erleichtern und ein Anstauen zu vermeiden. Außerdem wird die Verlegung mit einer Mindestfuge von 3 mm empfohlen. Aufgrund der Frostbeständigkeit des Feinsteinzeug hat die Platten einen Wasseraufnahmewert von praktisch Null. Diese Eigenschaft könnte, selbst bei fachgerechter Verlegung des Materials, zum Anstauen des Wassers auf dem Boden führen.

RECOMMANDATIONS DE POSE

On conseille de prévoir des inclinaisons transversales et longitudinales opportunes à réaliser au cours du nivellement et du compactage pour obtenir un drainage optimal du plan de piétinement. On recommande de prévoir un substrat réalisé avec des matériaux drainants pour favoriser l'écoulement de l'eau et en éviter la stagnation. On conseille également une pose avec un joint minimal de 3mm. Vu le caractère ingélif du grès cérame, la valeur d'absorption de l'eau de la dalles est pratiquement nulle. Cette propriété pourrait provoquer des stagnations d'eau localisées sur le carrelage, indépendamment de la réalisation d'une pose du matériel dans les règles de l'art.
